Product Parameters

Туре	Parameters			
Model	RG30-S	RG30-S-4G		
Communication method	Network port、WiFi/AP	No network port, WiFi/AP, 4G (default welding Xixun IoT chip, foreign countries need to provide their own reserved SIM card slot)		
Rated power	30W (can be used in series by two units)			
Sensitivity	91dB±3DB			
Input Voltage	12V			
Input Resisitance	8Ω			
Response frequency	120-18KHZ			
Speaker unit	4"+0.5"high pitch			
Weight	1.45kg			
Size	150 (Length) x 100 (wic	150 (Length) x 100 (width) x390 (mm height)		

Note: factory-welded IoT chip, the use of Sysolution Companycomes with the provision of IoT chip does not require any operator whitelist operation, directly can be used, with self-provided IoT card requires a real name system, you need to add the platform-related domain names, easily affected by many instability factors. SHENZHEN SYSOLITION FECHNOLOGY

Optional Topology Image

Optional accessories: cloud radio desktop microphone RHH1 to achieve remote shouting.
